Note:

- the two nested mkbibquotes:
  - an explicit mkbibquote, for the direct quote
  - an implicit one, inside `\lcnickname`
- the case number field contains a note as well
  - `casenumber = {438 (UK JCPC)}`,
- the “PC” in the note field, and “134” in the reportpage field
  - `reportpage = {134 (PC)}`, is also possible
- and that `\lcinlineparens` ignores nesting of brackets for any note, to get `(...(note))` instead of a nested `(...[note])`.
