QuickStart Guide

Exercise 3

Numbered Paragraphs

Table of Cases

	<i>Para</i>
Adam Armstrong's Case, (1823) 1 Lewin 245, 168 ER 1028	[10]
City of Columbus v Becher, 173 Ohio St 197, 180 NE 2d 836 [11], [13], [15]	
City of Marion v Becker, (1973) 6 SASR 13	[9], [12], [14]
<i>City of Marion v Becker</i> , (1973) 6 SASR 13	[9]
<i>City of Marion v. Becker</i> , (1973) 6 SASR 13	[9]
<i>City of Marion v. Becker</i> , (1973) 6 SASR 13	[9]
Donoghue v Stevenson, [1932] AC 562	[8], [12], [14]
<i>Donoghue v Stevenson</i> , [1932] AC 562	[8]
<i>Donoghue v. Stevenson</i> , [1932] AC 562	[8]
<i>Donoghue v. Stevenson</i> , [1932] AC 562	[8]
United States v Detroit Timber & Lumber Company, 200 US 321 .	[9]
<i>United States v Detroit Timber & Lumber Company</i> , 200 US 321 ...	[9]
<i>United States v. Detroit Timber & Lumber Company</i> , 200 US 321 ..	[9]
<i>United States v. Detroit Timber & Lumber Company</i> , 200 US 321 ..	[9]

Table of Statutes

	<i>Para</i>
Copyright Act, RSC 1985, c C-42	[18]
Crimes Act 1900 (NSW)	[17]
Crimes Act, 1900	[17]
Criminal Code RSC 1985, c C-46	[16]
Criminal Code, RSC 1985, c C-46	[16]

Table of Regulations

	<i>Para</i>
BC Reg 278/2008	[19]

[1] The lawcite QuickStart Guide Exercise Pack consists of three exercises. Exercise 1 illustrates the different styles available to the citation commands. Exercise 2 demonstrates how to produce the Table of Cases and a general index. Exercise 3 (this one) demonstrates the use of numbered paragraphs.

[2] Compile this document as per the orevious exercises, with with (xe/lua)latex, hiber, (xe/lua)latex, splitinex, (xe/lua)latex.

[3] Add the code in listing 1 to the document preamble.

```
%Numbered paragraphs
\newcounter{parno}
\renewcommand{\theparno}{\arabic{parno}}
\newcommand{\p}{\refstepcounter{parno}%
\noindent[\theparno]\ }
\setcounter{secnumdepth}{4}
\setcounter{parno}{0}
```

Code listing 1: Defining the paragraphing numbering command, `\p`

[4] To enable cross-referencing, put the code in listing 2 also in the preamble.

```
%numbered paragraphs cross-referencing method
\newcommand\definname{para}
\newcommand{\paradef}[1]{\label{#1}}
\newcommand\pararef[1]{\definname\ [\ref{#1}]}
```

Code listing 2: Cross-referencing commands

[5] To get the paragraph numbers at citation into the Table of Cases, put the code shown in listing 3 also into the document preamble.

```
%-----
\AtWriteToIndex{cases}{\let\thepage\theparano}
\AtWriteToIndex{legislation}{\let\thepage\theparano}
\AtWriteToIndex{regulations}{\let\thepage\theparano}
%-----
```

Code listing 3: Writing para numbers to the indexes.

[6] When running the SplitIndex step, format the Table of Cases paragraph numbers with the index style file code shown in listing 4.

```
delim_0 "\\space\\dotfill\\space ["
delim_1 "\\space\\dotfill\\space ["
delim_2 "\\space\\dotfill\\space ["
delim_n "], ["
delim_r "--"
delim_t "]"

line_max 172
```

Code listing 4: Putting square brackets in the ToC

[7] Change the index preamble to produce *Para* instead of *Page* (listing 5).

```
\newcommand\pagerefindexnoteb{\{%
\small\mdseries\itshape\hfill Para}}
```

Code listing 5: Index Preamble

Examples

[8] Citations. Example of usage. The first case is also mentioned in para [14].

Index Style File

[21] To prevent spurious spaces appearing in the ToC after **[** for long citations because the default line length in the index file is 72 characters followed by a newline beginning with two tabs (to make the index file human-readable), set `line_max` in the index style file (.ist) to a larger number.

–oooOooo–

General Index

	<i>Para</i>
72 chars	[21]
