Note:

- the two nested mkbibquotes:
  - an explicit mkbibquote, for the direct quote
  - an implicit one, inside `\lcnickname`
- the case number field contains a note as well
  - `casenumber = {438 (UK JCPC)},`
- the "PC" in the note field, and "134" in the reportpage field
  - `reportpage = {134 (PC)},` is also possible
- and that `\lcinlineparens` ignores nesting of brackets for any note, to get (...(*note*)) instead of a nested (...[*note*]).
